# Computer Engineering 111 Test 1 February 11, 2000

| Name   |
|--|
| Nine problems, 100 points.   |
| Closed books, closed notes, no calculators. You would be wise to read all problems before beginning, note point values and difficulty of problems, and budget your time accordingly. |
| Please do not open the test until I tell you to do so.   |
| Good luck!   |

1. (5 points)  $F = A(B + (AC \bigoplus D))$ Rewrite F in minimal SOP form. Show your work! (Hint: It works to use a K-map but using the relations of Boolean algebra is much quicker.

(minimal SOP) F =

2. (12 points) Redraw this circuit in NAND – NAND representation. For full credit, the best solution uses 8 NAND gates, but any correct answer will get partial credit.

| 3. (11 total points) | 3. | (11 | total | points | , |
|----------------------|----|-----|-------|--------|---|
|----------------------|----|-----|-------|--------|---|

a) (2 points) convert to hex and binary:

$$47023 (octal) = (binary) = (hex)$$

b) (2 points) convert to decimal:

c) (5 points) convert to binary, octal and hex:

$$896.78125 (decimal) = (octal)$$

$$896.78125 (decimal) = (hex)$$

d) (2 points) convert to octal and hex

$$1001001011.11100101 \text{ (binary)} = (octal) = (hex)$$

4. (20 points) Find a minimal SOP implementation of F as given in the truth table below. Use your choice of methods, but show your work.

| Decimal<br>0 | ABCDE F F(E)<br>00000 0 | ABCD |  |
|--------------|-------------------------|------|--|
| 1            | 00001 1                 |      |  |
| 2            | 00010 1                 | 1    |  |
| 3            | 00011 0                 |      |  |
| 4            | 00100 0                 |      |  |
| 5<br>6       | 00101 1                 |      |  |
| 7            | 00110 0<br>00111 0      | (    |  |
| 8            | 00111 0<br>01000 0      | 1    |  |
| 9            | 01000 0                 | 1    |  |
| 10           | 01001 1                 | }    |  |
| 11           | 01010 1                 | }    |  |
| 12           | 01100 0                 | ł    |  |
| 13           | 01101 0                 |      |  |
| 14           | 01110 0                 | Ì    |  |
| 15           | 01111 1                 |      |  |
| 16           | 10000 0                 |      |  |
| 17           | 10001 1                 |      |  |
| 18           | 10010 1                 |      |  |
| 19           | 10011 0                 |      |  |
| 20           | 10100 0                 |      |  |
| 21           | 10101 1                 |      |  |
| 22           | 10110 0                 |      |  |
| 23           | 10111 0                 |      |  |
| 24           | 11000 0                 |      |  |
| 25           | 11001 0                 |      |  |
| 26           | 11010 1                 |      |  |
| 27           | 11011 1<br>11100 0      |      |  |
| 28<br>29     | 11100 0<br>11101 0      |      |  |
| 30           | 11110 0                 |      |  |
| 31           | 11111 0                 |      |  |
| <b>5</b> 1   | 11111 V                 |      |  |

### 5. (17 points)

Al has class 8:30 - 9:30 MWF and 2:00 - 3:30 TTh

Bob has class 12:00 - 1:30 and 2:00 - 3:30 TTh

Cathy has class 8:30 - 9:30 MWF and 12:00 - 1:30 TTh

D = 0 if today is T or Th, and D = 1 if today is MW or F.

A = 0 if Al skips all classes today, and A = 1 if Al attends all classes today

B = 0 if Bob skips all classes today, and B = 1 if Bob attends all classes today

C = 0 if Cathy skips all classes today, and C = 1 if Cathy attends all classes today

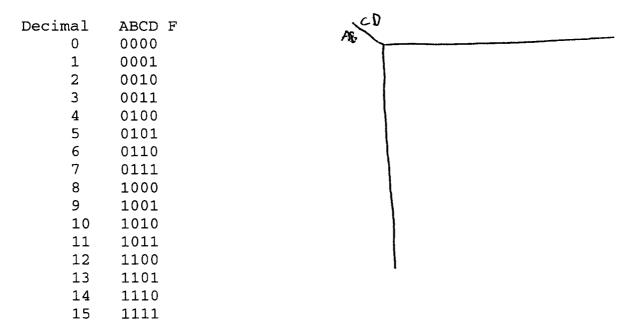

F = 0 if no two of Al, Bob, and Cathy are in class at the same time today, and F = 1 if any two of Al, Bob, and Cathy are in class at the same time today.

Write F in terms of minterms, and again in maxterms, i.e.:

$$F = \Sigma m \tag{}$$

$$F = \prod M($$

Find the minimal SOP expression for F.

Would your logic be simplified if Cathy <u>never</u> skips classes on MWF? If so, give the simplified expression. If not, say why not.

## 6. (9 points)

 $F = \prod M(1,4,5,9,12,14,15)$ Write the <u>canonical</u> POS expression and the <u>minimal</u> SOP expression for F.

| Decimal ABCD 0 0000 | F | ABICO    |
|---------------------|---|----------|
| 1 0001              |   | $\Gamma$ |
| 2 0010              |   | 1        |
| 3 0011              |   | }        |
| 4 0100              |   | ļ        |
| 5 0101              |   | Į.       |
| 6 0110              |   | ]        |
| 7 0111              |   | 1        |
| 8 1000              |   | 1        |
| 9 1001              |   | 1        |
| 10 1010             |   | }        |
| 11 1011             |   | - 1      |
| 12 1100             |   | }        |
| 13 1101             |   | i        |
| 14 1110             |   |          |
| 15 1111             |   |          |
|                     |   |          |

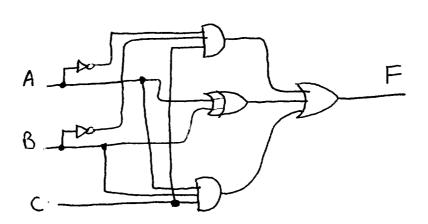

## 7. (9 points)

Re-implement the diagram shown with exactly:

- a) Two 2-input AND gates Two inverters One 3-input OR gate
- b) One XOR gate One 2-input OR gate

Show your work and sketch your solutions on both parts!

| ABC | F |  |
|-----|---|--|
| 000 |   |  |
| 001 |   |  |
| 010 |   |  |
| 011 |   |  |
| 100 |   |  |
| 101 |   |  |
| 110 |   |  |
| 111 |   |  |
|     |   |  |

8. (9 points) F is given by the truth table below. Express F in minimal SOP form, and as a sum of minterms, i.e.  $F = \Sigma m($ 

SOP Form: F =

| Decimal<br>0 | ABCD F | AE CD |
|--------------|--------|-------|
| 1            | 0000 0 | AB    |
| 2            | 0010 1 |       |
| 3            | 0010 1 |       |
| 4            | 0100 1 |       |
| 5            | 0101 1 |       |
| 6            | 0110 1 |       |
| 7            | 0111 1 |       |
| 8            | 1000 0 |       |
| 9            | 1001 1 |       |
| 10           | 1010 0 |       |
| 11           | 1011 0 |       |
| 12           | 1100 1 |       |
| 13           | 1101 0 | 1     |
| 14           | 1110 1 |       |
| 15           | 1111 1 |       |
|              |        |       |

## 9. (8 points) Your input is a BCD signal and your output is:

F = 
$$\begin{cases} 1 & \text{if the input is a valid currency in US dollars, i.e. $1, $2, $5} \\ 0 & \text{otherwise} \end{cases}$$

Find the minimal SOP form.

| Decimal | ABCD F |  |
|---------|--------|--|
| 0       | 0000   |  |
| 1       | 0001   |  |
| 2       | 0010   |  |
| 3       | 0011   |  |
| 4       | 0100   |  |
| 5       | 0101   |  |
| 6       | 0110   |  |
| 7       | 0111   |  |
| 8       | 1000   |  |
| 9       | 1001   |  |
| 10      | 1010   |  |
| 11      | 1011   |  |
| 12      | 1100   |  |
| 13      | 1101   |  |
| 14      | 1110   |  |
| 15      | 1111   |  |
|         |        |  |
